COMPANY OVERVIEW

The future of the circular economy starts before end-of-life.

Exxita is building the Intelligence Infrastructure for Circularity, combining industrial operations, technology lifecycle expertise and **Corely**—its proprietary Lifecycle Intelligence platform—to maximise the value of every technology asset.

THE INDUSTRY SHIFT

FROM Waste Management	FROM Recycling	FROM Physical Infrastructure
TO Lifecycle Value Management	TO Repair · Refurbishment · Reuse	TO Lifecycle Intelligence

Accelerated by EU Right to Repair · ESPR · Digital Product Passports · CSRD · CRMA

INTEGRATED BUSINESS MODEL

<p>Business Solutions</p> <p>Technology Lifecycle Services</p> <p>Deploying, managing and maintaining critical technology infrastructure to maximise asset performance, availability and lifespan.</p>	<p>Circular Impact</p> <p>Repair · Refurbishment · Recovery</p> <p>Preserving value through repair, refurbishment, remanufacturing, component recovery and responsible recycling.</p>	<p>Smart Tech</p> <p>Corely Circularity Intelligence Platform</p> <p>Transforming operational activity into AI-powered Lifecycle Intelligence, enabling traceability, lifecycle optimisation and Digital Product Passport readiness.</p>
--	---	--

Operations generate intelligence. Corely transforms that intelligence into better lifecycle decisions — preserving more value across every technology asset.

THE EXXITA ADVANTAGE

Every technology asset managed continuously strengthens Corely's Lifecycle Intelligence.

Built on more than two decades of operational expertise, Corely transforms every lifecycle interaction into proprietary intelligence—creating a cumulative advantage that improves every future lifecycle decision.

Why it matters

- ✓ **Operations generate intelligence** Every repair, refurbishment and lifecycle event enriches Corely.
- ✓ **Intelligence improves decisions** AI-powered insights optimise repair, reuse, recovery and compliance.
- ✓ **Better decisions preserve more value** Higher-value outcomes for customers. Stronger intelligence for the future.
